CELEBRATING NATIONAL HEALTH CENTER WEEK

About the Community Fun & Wellness Block Party

Every August during National Health Center Week, 500 to 800 families discover that healthcare is within reach—regardless of ability to pay. The Community Fun & Wellness Block Party connects Huntsville families to essential healthcare services in a welcoming, fun environment. We've made this event completely free to ensure our most vulnerable neighbors can join.

National Health Center Week: A Local Story in a National Movement

National Health Center Week celebrates America's 1,500+ community health centers that serve as vital healthcare safety nets in their communities. In North Alabama, our three partner centers: Central North Alabama Health Services, Thrive Alabama, and HAPPI Health—proudly join this national movement, standing together to expand access and to ensure that every person has a healthcare home.

"This collaboration exists because too many neighbors live without access to basic care."
