

The Journey to Better Health

Every Corner, Every Bridge, Together.

**National Health Center Week
August 2—8, 2026**

Hāna Health continues to expand its network of visiting specialists, offering providers in cardiology, dermatology, physical therapy, women's health, behavioral health, chiropractic care, acupuncture, and more. While many specialty services are now available locally, some patients still need to travel to Central Maui or O'ahu for advanced care.

Join Hāna Health during National Health Center Week as we celebrate successful healthcare journeys and access to the care that is needed to help make better health possible. Follow our social media throughout the week for inspiring stories and health education. Participation welcomed.

The Journey to Better Health
